

Course Schedule - Fall 2006

Economics

202 **Economic Statistics I** Credit: 3 hours.

Introduction of basic concepts in statistics including the presentation of data, descriptive statistics, probability theory, discrete and continuous distributions, sampling distributions, estimation, and hypothesis testing. The approach of the class includes both learning the concepts behind basic statistics and also how to apply these concepts in "real-life" situations. Utilizes a practical project format. To complete the Business Statistics sequence, students must also complete ECON 203. Students may not receive credit for this course if they have received credit for a college-level introductory statistics course such as PSYC 235; SOC 280; or STAT 100. Prerequisite: Credit or registration in one of MATH 220, MATH 221, MATH 234.

This course satisfies the General Education Criteria for a Quant Reasoning I course.

Instructions will be given during the first lecture as to where you should meet for your TA section. Evening examinations may be offered in this course. Students must register for one lab and one lecture section.
