

Course Schedule - Spring 2006

Economics

101 *Introduction to Economics* Credit: 4 hours.

General survey of the operation of the economic system; emphasizes the determination of the level of national income, the pricing and allocation of products, and factors of production under existing conditions in the United States. This is an honors course limited to students currently enrolled in the Chancellor's Scholar Program. Students with credit in ECON 102 or ECON 103 may receive 2 hours credit in ECON 101. Students with credit in both ECON 102 and ECON 103 may not receive credit for ECON 101.

This course satisfies the General Education Criteria for a UIUC Social Sciences course.

202 Economic Statistics I Credit: 3 hours.

Introduction of basic concepts in statistics including the presentation of data, descriptive statistics, probability theory, discrete and continuous distributions, sampling distributions, estimation, and hypothesis testing. The approach of the class includes both learning the concepts behind basic statistics and also how to apply these concepts in "real-life" situations. Utilizes a practical project format. To complete the Business Statistics sequence, students must also complete ECON 203. Students may not receive credit for this course if they have received credit for a college-level introductory statistics course such as PSYC 235; SOC 280; or STAT 100. Prerequisite: Credit or registration in MATH 234 or equivalent.

This course satisfies the General Education Criteria for a Quant Reasoning I course.

Instructions will be given during the first lecture as to where you should meet for your TA section. Evening examinations may be offered in this course. Students must register for one lab and one lecture section.

203 *Economic Statistics II* Credit: 3 hours.

Continuation of ECON 202. Builds upon point and interval estimation as well as hypothesis testing skills first introduced in ECON 202. Utilizes a practical project format to extend the student skill set to include simple and multiple linear regression and time series techniques. Prerequisite: ECON 202; MATH 234 or equivalent.

Students must register for one lab and one lecture section.

503 Macroeconomic Theory I Credit: 4 hours.

Introduces students to a variety of dynamic general equilibrium models that currently dominate the study of growth and economic fluctuations. These models include: neoclassical growth models, overlapping generations models, CAPM models, search models, and endogenous growth models. In covering these models, the course also seeks to develop a set of techniques for students to use. These techniques include discrete time optimization, continuous time optimization, dynamic programming and model calibration. Prerequisite: ECON 302 and ECON 303, or equivalent; calculus.
